#### Haecksen Geekend

### Git Workshop for Beginners

chjana

### Be Ready!

- Install Git:
  - https://git-scm.com/book/en/v2/Getting-Started-Installing-Git
  - for windows: https://tortoisegit.org/download/

Get your GitHub Account: https://github.com/join

 Setup your Github ssh credential: https://docs.github.com/en/authentication/connecting-to-github-with-ssh/generating-a-new-ssh-key-and-adding-it-to-the-ssh-agent

### Plan for today :-)

- Part 1: UI, Command line interface, repo (40min)
- Part 2: Staging and commits (20min)
- Part 3: Syncing with the remote host (10min)
- Part 4: Branch and merge (40min)

- Many group activities, Interactive
- The first personal repository at GitHub

### Part 1: UI, Commands and Repo

Conceptual Understanding of Git

Examples of Basic Commands

### What is Git for?

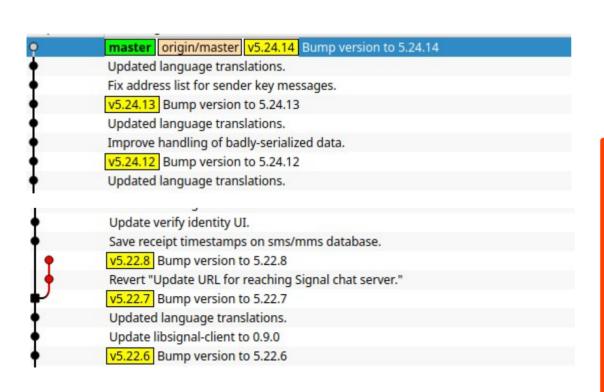

Version Control

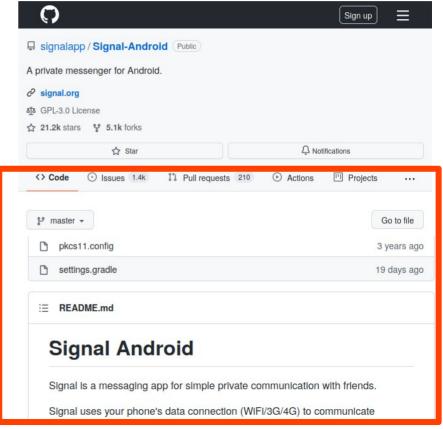

Collaboration

Workflow

### What can do with Git? - Repo

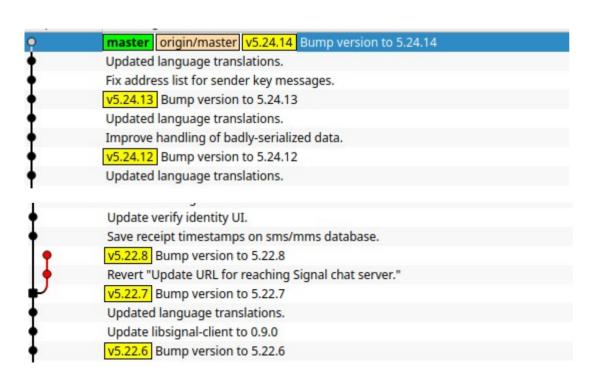

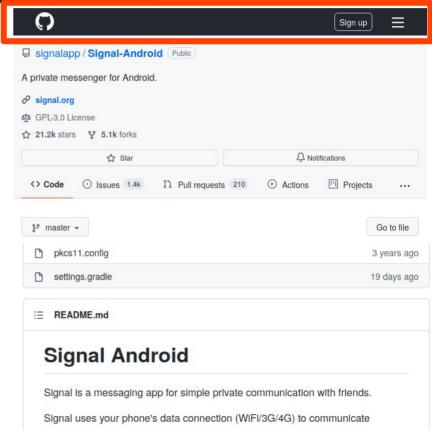

### What can do with Git? - Hosting

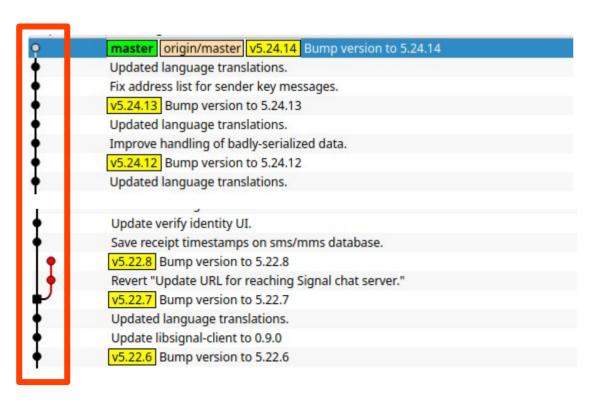

heuna@teekanne //Signal-Android / master ls
apntool core-util image-editor paging build.gradle gradle.properties LICENSE README.md
app device-transfer libsignal reproducible-builds CONTRIBUTING.md gradlew NOTICE settings.gradle
buildSrc gradle lintchecks video dependencies.gradle gradlew.bat pkcsll.config

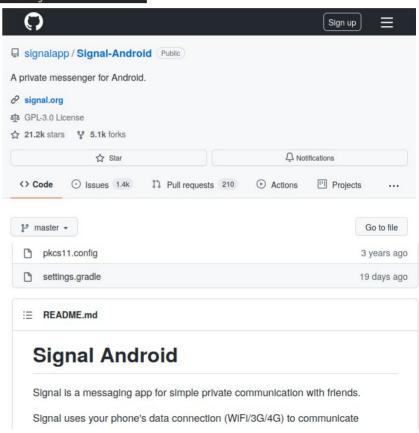

### What can we do with Git? - Commits

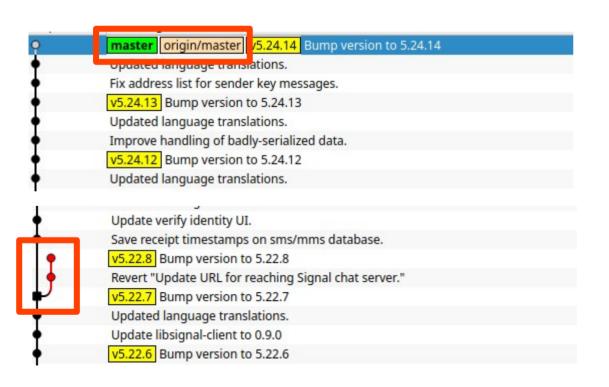

heuna@teekanne //Signal-Android / master ls
apntool core-util image-editor paging build.gradle gradle.properties LICENSE README.md
app device-transfer libsignal reproducible-builds CONTRIBUTING.md gradlew NOTICE settings.gradle
buildSrc gradle lintchecks video dependencies.gradle gradlew.bat pkcs11.config

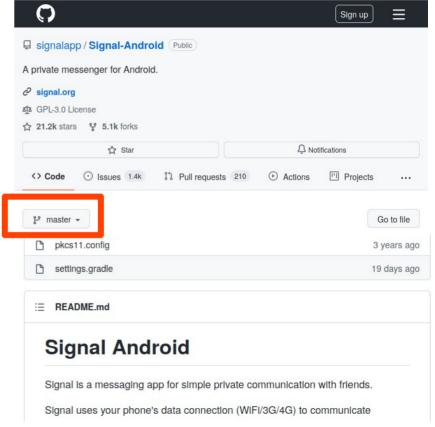

### What can we do with Git? - Branch

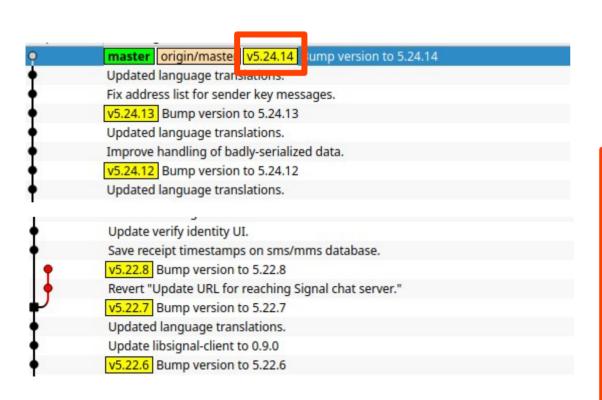

heuna@teekanne ~/Signal-Android // master | ls
apntool core-util image-editor paging build.gradle gradle.properties LICENSE README.md
app device-transfer libsignal reproducible-builds CONTRIBUTING.md gradlew NOTICE settings.gradle
buildSrc gradle lintchecks video dependencies.gradle gradlew.bat pkcs11.config

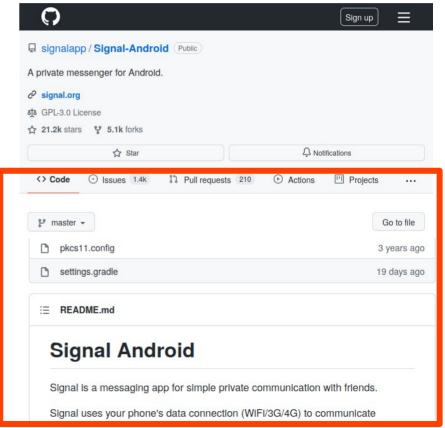

## What can we do with Git? - Tag

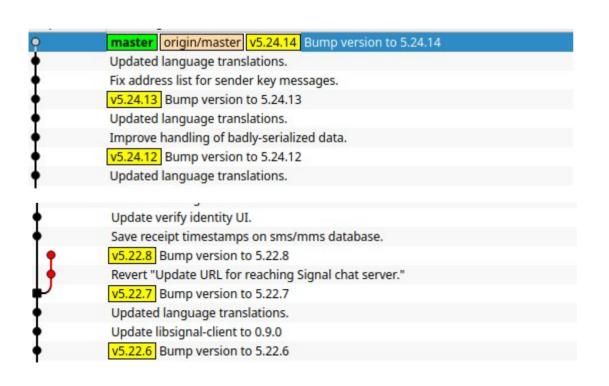

heuna@teekanne //Signal-Android / master ls
apntool core-util image-editor paging build.gradle gradle.properties LICENSE README.md
app device-transfer libsignal reproducible-builds CONTRIBUTING.md gradlew NOTICE settings.gradle
buildSrc gradle lintchecks video dependencies.gradle gradlew.bat pkcs11.config

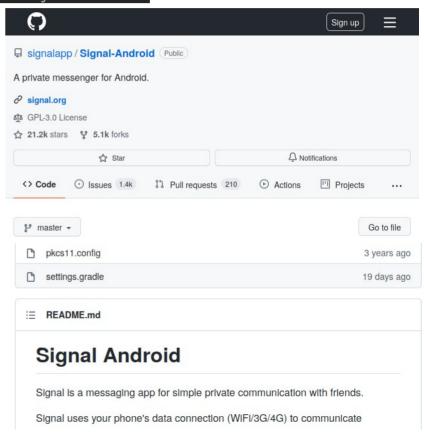

### What can we do with Git? - and more

heuna@teekanne //Signal-Android / master ls
apntool core-util image-editor paging build.gradle gradle.properties LICENSE README.md
app device-transfer libsignal reproducible-builds CONTRIBUTING.md gradlew NOTICE settings.gradle
buildSrc gradle lintchecks video dependencies.gradle gradlew.bat pkcsll.config

Conceptual Understanding of Git

Examples of Basic Commands

## Cloning

git clone <repository\_address>

- To see the results, try
  - Is
  - Check out via git log or gui-clients
    - https://git-scm.com/downloads/guis

### Create New Repo

- mkdir <directory\_name>
- git Init

Conceptual Understanding of Git

Examples of Basic Commands

### **Exercises**

group-a. clone your favorite open source repository and check the history with a gui-client or git log

group-b. create your own repository and check out what happened in the directory by trying Is -al

## Part 2: Staging, Commits

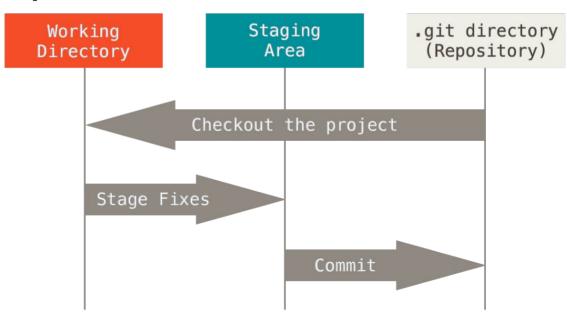

Conceptual Understanding of Git

Examples of Basic Commands

### How can Git do this cool things?

- Patches: difference of the codes
- Commits with unique hashes

Stages

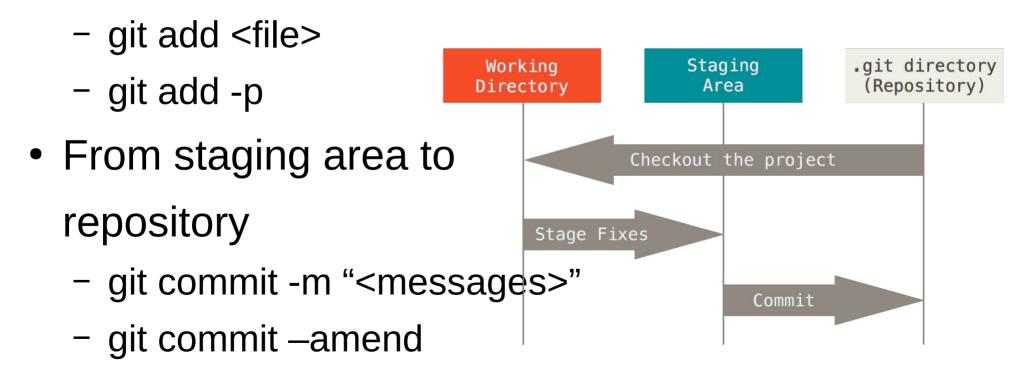

Conceptual Understanding of Git

Examples of Basic Commands

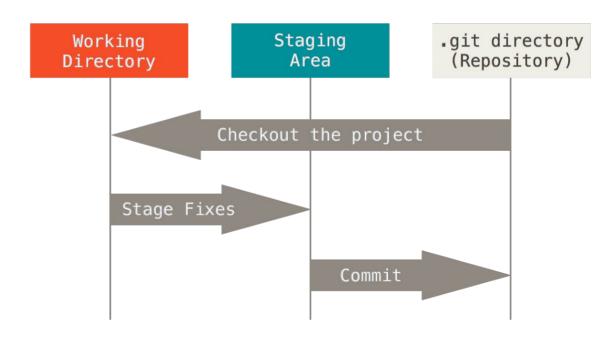

## Commit – adding the history

From working directory to staging area

#### Status check

- git diff
- git status

Conceptual Understanding of Git

Examples of Basic Commands

## Git config for the first time user

- git config --global user.name "John Doe"
- git config --global user.email "john@doe.com"

### **Exercises**

Each group in pair programming.

- Add a file named "Readme.md" of which has contents "### My first repo".
- add the file into the stage
- commit the change
- check out the history

### Part 3: Remote Host

Conceptual Understanding of Git

Examples of Basic Commands

### **Hosting Services**

- GitHub
- GitLab
- Self hosting ...

## **Exercise Together**

Create own repo at Github

Conceptual Understanding of Git

Examples of Basic Commands

## Syncing with Remote

- git push <remote> <branch>
- git pull <remote> <branch>

- git push / git push -u <remote> <branch>
- git pull / git pull <remote> <branch>

Conceptual Understanding of Git

Examples of Basic Commands

### **Exercises**

Each group in pair programming.

- push the new commit in the created repo to the created github remote

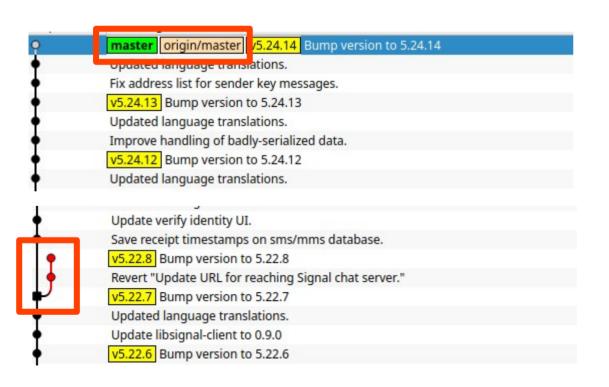

# Part 4: Branching and Merging

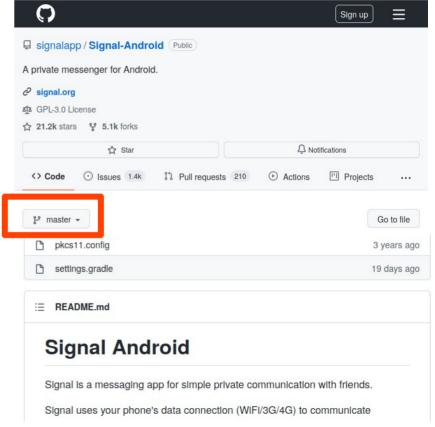

Conceptual Understanding of Git

Examples of Basic Commands

### What can we do with Git? - Branch

heuna@teekanne ~/Signal-Android // master | ls
apntool core-util image-editor paging build.gradle gradle.properties LICENSE README.md
app device-transfer libsignal reproducible-builds CONTRIBUTING.md gradlew NOTICE settings.gradle
buildSrc gradle lintchecks video dependencies.gradle gradlew.bat pkcs11.config

Conceptual Understanding of Git

Examples of Basic Commands

#### Branch

- git branch <new\_branch>
- git switch <other\_branch>
- git checkout -b <new\_branch>

- git branch
- git branch –all

Conceptual Understanding of Git

Examples of Basic Commands

## Group Challenge Exercises

- Each group
  - fork the repository hahey/geekend\_gitworkshop
  - clone the repository
  - change the branch for the team
  - edit the introduction of the participant list and commit
  - push to the forked branch

### **Exercise Together**

- Send two pull requests to the repo hahey/geekend\_gitworkshop
  - One to the main branch
  - One to the team branch

#### Demo

- Code reviews in the pull requests
- Merging Branch
- Merge Conflicts
- Looking up the command by git --help
- Rebasing
- Best Practice: a linear history
